To Whom It May Concern:

I am writing this letter of recommendation in support of Mr. Rishit Saiya in his application for the Information Technology and Cyber Security internship. Rishit is a computer science student in his second semester engineering coursework toward the BS with major in Computer Science. With a Concentration in Information Assurance and Security, he was recently engaged as trainee in Information Security department for a duration the months of May & June 2019 in USA.

Rishit has a unique combination of strong academics and deep technical ability, and entrepreneurial spirit, having started various cyber security initiatives in his college and here in the US. Rishit is a highly motivated, patient and dedicated individual in whatever endeavor he undertakes. Whether learning evolving cyber threat landscape and information security standards, networking & TCP/IP fundamentals, presenting security ideas at the conference, leading the secure application development club or participating on the Math tournament team, Rishit gives every effort of his utmost energy and dedication.

That persistence applies to his cybersecurity studies, as well. In spite of his preliminary experience with Linux, Rishit demonstrated and powered through each of the in-depth vulnerability scanning assignments in my department, setting up virtual machines running Kali Linux, configuring and deploying intrusion detection tools, scanning IP to detect and report threats, using array of other security tools.

I would highly recommend Rishit for the internship program based on his strong cybersecurity interest, work ethic, high academic standing, and self-reliant, motivated, entrepreneurial personality. I believe he would be an asset to the team and would make strides in cybersecurity world. If I can provide any further information in support of Mr. Saiya's application, please do not hesitate to contact me by email at ketan.shah@gobio.com, or by phone at 484-557-9888.

Sincerely,

Ketan Shah, CISSP
